

# Brew Tubing

## Fluid Transfer Solutions for Every Step of the Brewing Process

Providing hose and tubing since 1954, NewAge® Industries manufactures silicone tubing for hot transfer processes as well as tubing and hose for the cooler side and where pressure is involved. Smooth inner surfaces ensure good flow properties, and the products are listed by the National Sanitation Foundation (NSF-51) for use with food equipment materials.

### Silicone for Hot Processes

- Handles temperatures from -100°F to 350°F
- Odorless, tasteless and inert; translucent
- Resilient and extremely flexible
- FDA compliant materials plus NSF-51 listed
- Ideal for all brewing temperatures and for transferring boiling wort to and from the chiller
- Reinforced style also available

### Tubing & Hose for Cold Applications

- Braided style handles processes involving pressure
- Smooth surfaces for outstanding flow
- Transparent for full visual contact
- FDA compliant materials plus NSF-51 listed
- Useful for moving liquids below boiling temperature between the chiller and fermenter
- Unreinforced, phthalate-free style with antimicrobial properties available

APPLICATION SPOTLIGHT

# Brew Tubing

## Silcon® Silicone Tubing

- -100°F to 350°F
- 5 to 28 psi\*
- 1/16" to 3/4" I.D.
- NSF-51 listed
- Good for fermentation & where purity is essential

## Nylobrade® Reinforced Hose

- -50°F to 140°F
- 70 to 465 psi\*
- 1/8" to 2" I.D.
- NSF-51 and NSF-61 listed
- For chiller transfer & blowoff

## Silbrade® Reinforced Silicone Hose

- -80°F to 350°F
- 75 to 233 psi\*
- 1/8" to 1" I.D.
- NSF-51 listed
- Handles higher pressures than unreinforced tubing
- Platinum cured version available

## Clearflo® Ag-47 Antimicrobial Tubing

- -40°F to 125°F
- 3/16" to 1/2" I.D.
- NSF-51 listed
- Guards against bacteria
- Easily flushed clean
